## PROFESSIONAL SUMMARY

A driven Junior Full Stack Web Developer with recent hands-on training in both front-end and back-end technologies. Passionate about building responsive, user-friendly web applications. Effective in team collaboration and dedicated to continuously solving technical challenges and growing skills.

### Top Achievements:

- Full-Stack Application Development
- **Architected and developed a complete full-stack web application** (e.g., e-commerce platform or blogging system) using **PHP, Laravel, and MySQL**, handling all aspects of user authentication, data management (CRUD operations), and session security.
- Front-End Optimization & Responsiveness **Redesigned and optimized a project's front-end** using modern standards (**HTML5, CSS3, and Sass**), achieving **full mobile responsiveness** and improving simulated page load performance by over **20%** through clean, organized code.
- Framework Implementation (React/WordPress) **Successfully implemented a core front-end framework (React)** by building a Single Page Application (SPA), or by **extending WordPress functionality** through custom coding, demonstrating rapid skill acquisition and practical application of advanced web tools.

## CORE COMPETENCIES

- **Web Development**PHP & Laravel, React, WordPress Development, Full-Stack Architecture, RESTful APIs
- **Front-End/Design**HTML5, CSS3, Sass, Responsive Design, UI/UX Principles
- **Database/Backend**MySQL Database Management, CRUD Operations, Version Control (Git)
- **Professional Skills**Problem Solving, Team Collaboration, Logical Thinking, Time Management, Communication

## WORK EXPERIENCE

**Web Developer**                      **Recently Completed My Full stack web-developer course**

**Al-Fateem Academy (Full Stack Web Development Course) 2025—Present**

- Engineered and deployed three core full-stack applications utilizing PHP and Laravel 9, demonstrating end-to-end development proficiency.
- Secured two applications by implementing custom User Authentication and Admin Panel features, managing user roles and access control with robust security practices.
- Developed a complete Inventory Management System using the PHP/Laravel stack, enabling CRUD (Create, Read, Update, Delete) operations for streamlined data handling.
- Built a scalable front-end Single Page Application (SPA) using React 17, applying fundamental architecture, reusable components, and dynamic page routing.
- Integrated APIs into projects (both React and Laravel applications) to fetch and display external data, showcasing understanding of basic API usage and communication.
- Created a functional digital selling website on WordPress, customizing the site using builders like Elementor and forms via WeForms, while configuring SMTP plugins for reliable email delivery.

## EDUCATION

**Web development course**                      **2025**

**Intermediate**                      **2024**

**FSc Pre-Medical** Government Degree College Hub • *Hub*

## PERSONAL PROJECTS

- **Inventory Management System** (PHP/Laravel/MySQL)
- **E-commerce/Blogging Platform SPA** (React 17 Frontend & Laravel 9 API Backend)
- **Basic Digital Selling Website** (WordPress, Elementor & Plugin Usage)
- **Full CRUD Application Development** (General PHP/MySQL)

## **CERTIFICATES**

(Certificate Pending: Completed all coursework and final projects.)
